INDEX TO VOLUME 35

SUBJECT INDEX

*Starred items are "Shorter Notes"

A. Algebra and Number Theory

05. Combinatorics

Bang, C. M. *Isomorphism types of infinite symmetric graphs*, 31.

Wright, E. M. *The probability of connectedness of an unlabelled graph can be less for more edges*, 21.

06. Order, Lattices, Ordered Algebraic Structures

Schnare, Paul S. *The topological complementation theorem à la Zorn*, 285.

08. General Mathematical Systems

Bang, C. M. *Isomorphism types of infinite symmetric graphs*, 31.

Davis, Robert C. *Quasi-cotripleable categories*, 43.

Grätzer, G. and Lakser, H. *Two observations on the congruence extension property*, 63.

10. Number Theory

Brown, Lawrence G. *Topologically complete groups*, 593.

Davis, Martin. *On the number of solutions of Diophantine equations*, 552.

Joshi, V. S. *On the order of some error functions related to k-free integers*, 325.

Mordell, L. J. *Rational functions representing all residues* mod *p*. II, 411.

Spira, Robert. *Zeros of $\zeta'(s)$ in the critical strip*, 59.

12. Algebraic Number Theory, Field Theory and Polynomials

Białynicki-Birula, A. *On subfields of countable codimension*, 354.

Weinberger, P. J. *A counterexample to an analogue of Artin's conjecture*, 49.

13. Commutative Rings and Algebras

Brown, William C. *An application of the algebra of differentials of infinite rank*, 9.

Cheatham, T. and Enochs, E. *The epimorphic images of a Dedekind domain*, 37.

Gustafson, William H. *On an induction theorem for relative Grothendieck groups*, 26.

Heinzer, William. *Locally affine ring extensions of a noetherian domain*, 377.

Heinzer, William and Ohm, Jack. *The finiteness of I when $R[X]/I$ is R-flat*. II, 1.

Janusz, G. J. *The Schur index and roots of unity*, 387.

Kohn, Peter. *Ideals generated by three elements*, 55.

Tang, Hwa Tsang. *Gauss' lemma*, 372.

Vasconcelos, Wolmer V. *The local rings of global dimension two*, 381.

14. Algebraic Geometry

Efroymson, Gustave. *Henselian fields and solid k-varieties*. II, 362.

15. Linear and Multilinear Algebra; Matrix Theory (finite and infinite)

*DeMarr, Ralph. *Nonnegative matrices with nonnegative inverses*, 307.

Solazzi, Robert E. *On isomorphisms between certain congruence groups*, 405.

Suchan, Gerald E. *Operators associated with a pair of nonnegative matrices*, 53.

16. Associative Rings and Algebras

Albert, A. A. *Tensor products of quaternion algebras*, 65.

Boratyński, M. *Injective dimension and completeness*, 357.

Brown, William C. *A note on higher derivations and integral dependence*, 367.

Fuelberth, John D. and Teply, Mark L. *A splitting ring of global dimension two*, 317.

Hutchinson, John and Zelmanowitz, Julius. *Quotient rings of endomorphism rings of modules with zero singular submodule*, 16.
Monk, G. S. *A characterization of exchange rings*, 349.
Nico, William R. *An improved upper bound for global dimension of semigroup algebras*, 34.
Shock, Robert C. *Orders in self-injective cogenerator rings*, 393.

17. Nonassociative Rings and Algebras
Goldman, Jerry. *Nodal algebras defined by skew-symmetric bilinear forms*, 333.
McCrimmon, Kevin. *Quadratic Jordan algebras whose elements are all invertible or nilpotent*, 309.

18. Category Theory, Homological Algebra
Davis, Robert C. *Quasi-cotripleable categories*, 43.
Fuelberth, John D. and Teply, Mark L. *A splitting ring of global dimension two*, 317.
Gustafson, William H. *On an induction theorem for relative Grothendieck groups*, 26.

20. Group Theory and Generalizations
Baumslag, Gilbert. *A finitely presented metabelian group with a free abelian derived group of infinite rank*, 61.
Davitt, Richard M. and Otto, Albert D. *On the automorphism group of a finite modular p-group*, 399.
Gustafson, William H. *On an induction theorem for relative Grothendieck groups*, 26.
Hickin, K. K. and Plotkin, J. M. *On the equivalence of three local theorem techniques*, 389.
Hill, W. Mack and Wright, Charles R. B. *Normal subgroups contained in the Frattini subgroup*, 413.
Janusz, G. J. *The Schur index and roots of unity*, 387.
Nico, William R. *An improved upper bound for global dimension of semigroup algebras*, 34.
Shult, E. *A note on Janko's simple group of order* 175,560, 342.
Solazzi, Robert E. *On the isomorphisms between certain congruence groups*, 405.

B. Analysis

26. Real Functions
Lawrence, Scott and Segalman, Daniel. *A generalization of two inequalities involving means*, 96.

28. Measure and Integration
Gowrisankaran, Chandra. *Quasi-invariant Radon measures on groups*, 503.
Saworotnow, Parfeny P. *Integral as a certain type of a positive definite function*, 93.

30. Functions of a Complex Variable
Brickman, Louis. *Extremal problems for certain classes of analytic functions*, 67.
Coonce, H. B. and Ziegler, M. R. *The radius of close-to-convexity of functions of bounded boundary rotation*, 207.
McCarty, Carl P. *Functions with real part greater than* α, 211.
Taylor, B. A. and Williams, D. L. *Boundary zero sets of* A^∞ *functions satisfying growth conditions*, 155.

32. Several Complex Variables and Analytic Spaces
Barth, Theodore J. *The Kobayashi distance induces the standard topology*, 439.
Patterson, David B. *The Teichmüller spaces are distinct*, 179.

34. Ordinary Differential Equations

Bobisud, L. E. *Asymptotic behavior of solutions of perturbed linear systems*, 457.

Chiou, Kuo-liang. *The existence of oscillatory solutions for the equation* $d^2y/dt^2+q(t)y^r=0$, $0<r<1$, 120.

DeKleine, H. Arthur and Drobot, Vladimir. *Some unbounded functions of regular growth*, 471.

Evans, W. D. *On the length of gaps in the essential spectrum of a generalised Dirac operator*, 137.

Ford, Wayne T. *On the first boundary value problem for* $[h(x, x', t)]'=f(x, x', t)$, 491.

Gustafson, G. B. *Eventual disconjugacy of selfadjoint fourth order linear differential equations*, 187.

*Hochstadt, Harry. *On semibounded differential operators*, 298.

Komkov, Vadim. *On the location of zeros of second-order differential equations*, 217.

Lovelady, David Lowell and Martin, Robert H., Jr. *A global existence theorem for a nonautonomous differential equation in a Banach space*, 445.

McCann, Roger C. *Perturbed asymptotically stable sets*, 107.

———. *Total stability in nondifferentiable systems*, 112.

Sharma, R. R. *Existence of solutions of abstract measure differential equations*, 129.

Teufel, Hugo, Jr. *Second order almost linear functional differential equations—oscillation*, 117.

Wilson, H. K. *Gauge functions and limit sets for nonautonomous ordinary differential equations*, 487.

35. Partial Differential Equations

Freund, D. D. *A note on Kaplun limits and double asymptotics*, 464.

Strauss, Monty J. *Uniqueness and norm convexity in the Cauchy problem for evolution equations with convolution operators*, 423.

———. *Generalizations of results of Agmon and Nirenberg to the Cauchy problem for evolution equations*, 431.

40. Sequences, Series, Summability

Atalla, Robert E. *On the consistency theorem in matrix summability*, 416.

Sharma, N. K. *Spectra of conservative matrices*, 515.

41. Approximations and Expansions

Freund, D. D. *A note on Kaplun limits and double asymptotics*, 464.

42. Fourier Analysis

*Blei, Ron C. *A note on some characterizations of Sidon sets*, 303.

Burnham, J. T. *Nonfactorization in subsets of the measure algebra*, 104.

Pollard, Harry. *The convergence almost everywhere of Legendre series*, 442.

Price, J. J. *Sparse subsets of orthonormal systems*, 161.

44. Integral Transforms, Operational Calculus

Fox, Charles. *Applications of Laplace transforms and their inverses*, 193.

Petersen, Bent E. *On the Laplace transform of a temperate distribution supported by a cone*, 123.

45. Integral Equations

Lew, John S. *On linear Volterra integral equations of convolution type*, 450.

Wheeler, Robert L. *A note on systems of linear integrodifferential equations*, 477.

46. Functional Analysis

Bazaraa, M. S., Goode, J. J. and Nashed, M. Z. *A nonlinear complementarity problem in mathematical programming in Banach space*, 165.

Brown, H. I., Kerr, D. R. and Stratton, H. H. *Corrections to "The structure of B[c] and extensions of the concept of conull matrix,"* 621.
*Chalice, Donald R. *On a theorem of Rudin*, 296.
Cohen, H. B., Labbe, M. A. and Wolfe, J. *Norm reduction of averaging operators*, 519.
Jenkins, J. W. *On the characterization of Abelian W*-algebras*, 436.
Koehler, Donald O. *The analytic properties of G_{2n} spaces*, 201.
Laison, Diane. *On W* embedding of AW*-algebras*, 499.
*Moore, Berrien III. *A factorable weight with zero Szegö infimum*, 301.
Petersen, Bent E. *On the Laplace transform of a temperate distribution supported by a cone*, 123.
Samn, Sherwood. *Existence of a seminormal basis in C*[0, 1], 183.
Shapiro, Joel H. *Noncoincidence of the strict and strong operator topologies*, 81.
Summers, W. H. *Separability in the strict and substrict topologies*, 507.
*Ylinen, Kari. *A note on the compact elements of C*-algebras*, 305.

47. Operator Theory

Bazaraa, M. S., Goode, J. J. and Nashed, M. Z. *A nonlinear complementarity problem in mathematical programming in Banach space*, 165.
Clark, Douglas N. *Commutants that do not dilate*, 483.
Fox, Charles. *Applications of Laplace transforms and their inverses*, 193.
Goebel, K. and Kirk, W. A. *A fixed point theorem for asymptotically nonexpansive mappings*, 171.
Gossez, Jean-Pierre. *On the range of a coercive maximal monotone operator in a nonreflexive Banach space*, 88.
Hanna, Michael P. *Generalized overrelaxation and Gauss-Seidel convergence on Hilbert space*, 524.
*Hochstadt, Harry. *On semibounded differential operators*, 298.
Howland, James S. *Nonexistence of asymptotic observables*, 175.
Klein, E. M. *The numerical range of a Toeplitz operator*, 101.
Kritt, Brian. *The Fourier transform of an unbounded spectral distribution*, 74.
Kurtz, Thomas G. *A random Trotter product formula*, 147.
Sato, Ryotaro. *On a general ratio ergodic theorem with weighted averages*, 177.

C. Applied Mathematics

65. Numerical Analysis

Hanna, Michael P. *Generalized overrelaxation and Gauss-Seidel convergence on Hilbert space*, 524.
Schultz, Martin H. *Error bounds for Galerkin's method for monotone operator equations*, 227.

81. Quantum Mechanics

Simon, Barry. *Continuum embedded eigenvalues in a spatially cutoff $P(\phi)_3$ field theory*, 223.

90. Economics, Operations Research, Programming, Games

Bazaraa, M. S., Goode, J. J. and Nashed, M. Z. *A nonlinear complementarity problem in mathematical programming in Banach space*, 165.
Peleg, Bezalel. *Topological properties of the efficient point set*, 531.

D. Geometry

52. Convex Sets and Geometric Inequalities

Hare, W. R., Jr. and Smith, C. R. *On convex subsets of a polytope*, 238.
Stolarsky, Kenneth B. *Sums of distances between points on a sphere*, 547.
Witsenhausen, H. S. *On closed curves in Minkowski spaces*, 240.

53. Differential Geometry

Brockett, R. W. and Sussmann, H. J. *Tangent bundles of homogeneous spaces are homogeneous spaces*, 550.

Hansen, Vagn Lundsgaard. *Integrably parallelizable manifolds*, 543.

Houh, Chorng-Shi. *On an integral formula for closed hypersurfaces of the sphere*, 234.

———. *Surfaces with maximal Lipschitz-Killing curvature in the direction of mean curvature vector*, 537.

Schneider, Rolf. *Closed convex hypersurfaces with second fundamental form of constant curvature*, 230.

E. Logic and Foundations

02. Logic and Foundations

Davis, Martin. *On the number of solutions of Diophantine equations*, 552.

04. Set Theory

Blass, Andreas. *Weak partition relations*, 249.

Zuckerman, Martin M. *Ordinal sum-sets*, 242.

F. Statistics and Probability

60. Probability Theory and Stochastic Processes

Heath, David C., Pruitt, William E. and Sudderth, William D. *Subfair red-and-black with a limit*, 555.

Huff, Barthel W. *Further comments on the continuity of distribution functions obtained by superposition*, 561.

G. Topology

22. Topological Groups, Lie Groups

Brown, Lawrence G. *Topologically complete groups*, 593.

Das, Mrinal Kanti. *Some properties of special functions derived from the theory of continuous transformation groups*, 565.

McCharen, John D. *Euclidean neighborhoods in compact semigroups*, 291.

54. General Topology

Cornette, J. L. and Lehman, B. *Another locally connected Hausdorff continuum not connected by ordered continua*, 281.

Green, John William. *Filter characterizations of C- and C*-embeddings*, 574.

Harris, Douglas. *Compact spaces and products of finite spaces*, 275.

Kannan, V. *A countable connected Urysohn space containing a dispersion point*, 289.

Martin, Harold W. *Metrization of symmetric spaces and regular maps*, 269.

Nanzetta, Philip and Plank, Donald. *Closed ideals in $C(X)$*, 601.

Schnare, Paul S. *The topological complementation theorem à la Zorn*, 285.

55. Algebraic Topology

Chapman, T. A. *Contractible Hilbert cube manifolds*, 254.

Feustel, C. D. *On embedding annuli in M^3*, 581.

Gordon, C. McA. and Heil, W. *Simply-connected branched coverings of S^3*, 287.

Lyon, Herbert C. *Knots without unknotted incompressible spanning surfaces*, 617.

57. Manifolds and Cell Complexes

Brockett, R. W. and Sussmann, H. J. *Tangent bundles of homogeneous spaces are homogeneous spaces*, 550.

Erle, Dieter. *Smooth structure and signature of codimension 2 embeddings*, 611.

Feder, S. and Segal, D. M. *Immersions and embeddings of projective spaces*, 590.

Hansen, Vagn Lundsgaard. *Integrably parallelizable manifolds*, 543.
Hodgson, J. P. E. *The Whitney technique for Poincaré complex embeddings*, 263.
Knoblauch, Tom. *Toroidal arcs are cellular*, 607.
Rinne, Robert L. *λ-equivariant bordism of maps*, 587.
Stong, R. E. *Map bordism of maps*, 259.
———. *A cobordism*, 584.

58. Global Analysis, Analysis on Manifolds

Strauss, Monty J. *Uniqueness and norm convexity in the Cauchy problem for evolution equations with convolution operators*, 423.
———. *Generalizations of results of Agmon and Nirenberg to the Cauchy problem of evolution equations*, 431.
